

The FCC should not! impliment any proposal that would lessen In telephone privacy law protections. Since In passed this, time at home is spent with family instead of dealing telemarketers. Before this law we were getting sometimes 4 to 5 calls a day, it was out of control. If the FCC wanted to do something about this problem it should have done so long before now!! And now you want to make changes that would scew a good thing for the people of Indiana, over a million people have signed up for this because it works LEAVE IT ALONE!!!
